Two weeks ago, we welcomed 123 new students to our Software Engineering, UX Engineering, and Digital Marketing cohorts!

During this Orientation Day, on-campus students received welcomes from [Chok](#), our team, and instructors + participated in team building activities.

Online students received the same warm welcomes, met each other, and took part in the day's events via webcam. We're so happy to watch the Kenzie Family grow and can't wait to see what these students accomplish. 🇺🇸💙

Today, Software Engineering students prepared for graduation by presenting their final capstone projects! It's been 12 months since these students began their tech journeys and today they shared:

- an app for tracking, rating, and sharing albums
- a website which hosts and organizes game FAQs (and hides spoilers)
- a movie catalog and rating platform which also lets you sort items by your celebrity crush
- a coin collecting and trading site which generates 10-digit serial numbers for each coin logged
- a recipe database that allows users to share their own recipes and rate friends' submissions

Congratulations to our awesome students on this accomplishment! Now let's get ready to graduate 🎓

#DiversityEngineered Challenge - Day 7: Accomplishments

Today we're sharing some photos from our most recent in-person graduation from January. All of these members of the [#KenzieFam](#), and many more not shown here, have accomplished so much as students, tech professionals, and people. We're always proud of anyone working to become [#KenzieMade](#) - it's truly an achievement in and of itself 💙

We had a great time hosting [Eric Bahn](#) (Hustle Fund; formerly Facebook and Instagram) and [Jeff Hoffman](#) (Entrepreneur, Producer; formerly Priceline) at our latest Innovation Series event!

Kenzie students, staff, and members of the Indy tech community enjoyed an evening of networking, beer, and plenty of anecdotes and advice about getting started in tech.

Kenzie students also enjoyed a guest lecture and a Q&A from Jeff earlier in the day.

Special thanks to our sponsors [Strada Education Network](#) and [Nameless Catering](#) as well as our host Indiana City Brewing Company. We can't wait to see you at our next event!

Congratulations to Shaquon and Rob on their recent job placements!

Shaquon is a Software Engineering apprentice with Next Chapter and will soon have the opportunity to work for a big name in the tech industry at their San Francisco headquarters!

Rob recently began as a UI Engineer at Driven Data where he's already designing, building, and deploying a data-analytics dashboard!

Congrats to these two on becoming **#KenzieMade** ❤️

Last week, Amy King, Senior UX Architect at [DMI \(Digital Management, LLC\)](#), stopped by for a Kenzie AMA with both our on-campus and online students all over the country. Check out some of her words of wisdom 🙌💙

[#uxui](#) [#womenintech](#) [#AMA](#)

"(In UX) We have a huge opportunity and, frankly, a huge responsibility to make a great impression in other ways than just on a screen."

"Success for a junior UX professional is to be flexible and open. Be ready to say 'I don't know' and then be ready to learn."

"Worked at DMI, I've worked across about 12 different industries. What other job can you do that in?"
